Data Science and Artificial Intelligence
Introduction to 3-Months Course

Dostdar Ali

Instructor

At
Institute of professional Development
Karakaroum international Univrsity
Gilgit, Gilgit Balistan

December 26, 2023

Table of Contents

Introduction to myself

My Name is Dostdar Ali,

- Education: MS in applied Mathematics and Machine learning.
- Institution: COMSATS university Islamabad.
- Research Domain: Neural Network, Deep learning.
- Data science and AI: One month ago I have Complete my six Months course.
- Current Status: Am a visiting lecturer at Karakorum international.
- Teacher Associate: Up Come march in 2024 at university Of Baltistan.
- Publications: Impact factor 3.7 W category and two paper under pipeline.

Introduction to the course

Why to learn Data Science and Artificial Intelligence? **Who** can learn , serving as a newly innovation the realm of data science and AI. What **Career** do I adopt?

The curriculum progresses, one-week for **Python Crash Course**, two weeks for **Basic Mathematics and Statistics**, followed by four-week each modules on **Data Science** and **Machine Learning**. The final week is dedicated to **Freelancing**.

Introduction to the course

Why to learn Data Science and Artificial Intelligence? **Who** can learn , serving as a newly innovation the realm of data science and AI. What **Career** do I adopt?

The curriculum progresses, one-week for **Python Crash Course**, two weeks for **Basic Mathematics and Statistics**, followed by four-week each modules on **Data Science** and **Machine Learning**. The final week is dedicated to **Freelancing**.

- Introduction to Python syntax and data types.
- Control flow and loops.
- Functions and modules.
- File handling in Python.

Week 1: Python Crash Course

- Introduction to Python syntax and data types.
- Control flow and loops.
- Functions and modules.
- File handling in Python.

Week 1: Python Crash Course

- Introduction to Python syntax and data types.
- Control flow and loops.
- Functions and modules.
- File handling in Python.

Week 1: Python Crash Course

- Introduction to Python syntax and data types.
- Control flow and loops.
- Functions and modules.
- File handling in Python.

Weeks 2-3: Basic Mathematics and Statistics

- Algebra and calculus fundamentals.
- Descriptive and inferential statistics.
- Probability theory.

Weeks 2-3: Basic Mathematics and Statistics

- Algebra and calculus fundamentals.
- Descriptive and inferential statistics.
- Probability theory.

Weeks 2-3: Basic Mathematics and Statistics

- Algebra and calculus fundamentals.
- Descriptive and inferential statistics.
- Probability theory.

Weeks 4-7: Data Science

- Data exploration and cleaning.
- Data visualization with tools like Matplotlib and Seaborn.
- Introduction to Pandas for data manipulation.
- Case studies and practical applications.

Weeks 4-7: Data Science

- Data exploration and cleaning.
- Data visualization with tools like Matplotlib and Seaborn.
- Introduction to Pandas for data manipulation.
- Case studies and practical applications.

Weeks 4-7: Data Science

- Data exploration and cleaning.
- Data visualization with tools like Matplotlib and Seaborn.
- Introduction to Pandas for data manipulation.
- Case studies and practical applications.

Weeks 4-7: Data Science

- Data exploration and cleaning.
- Data visualization with tools like Matplotlib and Seaborn.
- Introduction to Pandas for data manipulation.
- Case studies and practical applications.

- Supervised and unsupervised learning.
- Regression and classification algorithms.
- Clustering and dimensionality reduction.
- Model evaluation and hyperparameter tuning.

Weeks 8-11: Machine Learning

- Supervised and unsupervised learning.
- Regression and classification algorithms.
- Clustering and dimensionality reduction.
- Model evaluation and hyperparameter tuning.

Weeks 8-11: Machine Learning

- Supervised and unsupervised learning.
- Regression and classification algorithms.
- Clustering and dimensionality reduction.
- Model evaluation and hyperparameter tuning.

Weeks 8-11: Machine Learning

- Supervised and unsupervised learning.
- Regression and classification algorithms.
- Clustering and dimensionality reduction.
- Model evaluation and hyperparameter tuning.

Week 12: Freelancing

- Freelancing platforms and marketplaces.
- Building a freelance portfolio.
- Client communication and project management.

Week 12: Freelancing

- Freelancing platforms and marketplaces.
- Building a freelance portfolio.
- Client communication and project management.

Week 12: Freelancing

- Freelancing platforms and marketplaces.
- Building a freelance portfolio.
- Client communication and project management.

Final Project

- Introduction and background of the course.
- Overview of Python, mathematics, statistics, data science, and machine learning modules.
- Demonstration of a final project.

Final Project

- Introduction and background of the course.
- Overview of Python, mathematics, statistics, data science, and machine learning modules.
- Demonstration of a final project.

Final Project

- Introduction and background of the course.
- Overview of Python, mathematics, statistics, data science, and machine learning modules.
- Demonstration of a final project.

Thank you!
